

I listen to KLOVE in the San Jose California area whenever I am in the car, at home or at work. I am glad that I can tune in to KLOVE on several different FM bands: 91.9, 99.3 and 89.5 because sometimes I lose the signal. If it were to be replaced by an LPFM station, I don't think I would be able to hear KLOVE! This station offers a family friendly, positive listening experience - an alternative to other stations. Please keep KLOVE on the FM translator! Thank you
